

HO-CHUNK NATION

DEPARTMENT OF HEALTH

FOR IMMEDIATE MEDIA RELEASE

DATE: August 18, 2021

CONTACT: Kiana Beaudin, Ho-Chunk Nation Health Department Health Officer, 715-284-9851

Within the State of Wisconsin, the demand for COVID-19 testing has dramatically increased. As more positive cases are identified across the State testing demands are projected to raise. The Ho-Chunk Nation Department of Health over the last two-week period have also seen a dramatic increase in demand for testing at both clinical locations and Strike Team events. Due to this surge and limited testing materials our clinical locations have extremely limited capacity to run rapid/real time COVID-19 tests. Samples that are taken will be sent to the contracted laboratory for analysis. Lab results may take up to 48 business hours to process. Community members should stay home until test results have been provided if you are unvaccinated and have had a known exposure OR you are experiencing symptoms.

The HCN DOH continues to recommend testing for anyone experiencing even the mildest of symptoms. Please contact the Ho-Chunk Health Care Center at 715-284-9851 or the House of Wellness Clinic at 608-355-1240 OR visit <https://health.ho-chunk.com/> for the locations of our Strike Team events.
