

HAS COVID-19 VACCINE BEEN APPROVED FOR KIDS 5-11YEARS? NOT YET

Where is the vaccine in the approval process?

Currently the FDA has authorized Pfizer for 5-11 yr olds. NEXT the Advisory Committee on Immunization Practices AND the Centers for Disease Control must review the data. AFTER this is complete the WI Department of Health will review the recommendations and distribute Provider clinical considerations to begin giving vaccine.

WILL VACCINE BE AVAILABLE FOR KIDS 5-11?

Once the vaccine is completely approved AND Providers have completed the required training AND we have received the pediatric vaccine from the State, the DOH will be able to provide Pfizer vaccine for children 5-11 years old.

WHEN CAN I MAKE AN APPOINTMENT FOR MY CHILD:
